Nexen Energy ULC
801 – 7th Avenue SW
Calgary, AB T2P 3P7

To Whom It May Concern:

Tallman Geological Services have provided wellsite geological personnel over the past year at Nexen's Oil Sands project in NE Alberta where they participated in the drilling of long reach Keg River Horizontal water disposal wells. The Tallman Geological field geologists were professional and competent with respect to their performance on our project and demonstrated a positive attitude towards rig safety and a great work ethic. Additionally, they demonstrated excellent communication skills with the directional drillers and company men.

The Tallman Geological management team have been very supportive of our project and always provided knowledgeable and professional personnel. I would not hesitate to use Tallman Geological Services for any future wellsite geological supervision needs.

Sincerely,

Jim Ringheim, P.Geol.
